The increasing volume of today's traffic and the inflexibility of mass producers in offering less and less freedom of choice to the individual motorist calls for a new concept in car production.

We at Wood & Pickett, with our team of skilled craftsmen and the experience of more than a decade offer you a real alternative.

As a basis we have chosen the most popular car on British roads, Leyland Mini, renowned for its performance, economy and manoeuvrability. Coupled with this historic car we offer you the opportunity of having personalised transport built to the specification of your choice. How is this done? Simply by reading through the attached

specification sheet and selecting the items you want for your car.

Remember you can have any individual item on the list, from a special leather rim steering wheel in the colour of your choice to a full luxury 'Margrave'. The choice is yours and we are happy to work on your existing car or to supply you with a new car.

We usually have a number of interesting cars in the course of preparation at our premises, and you would be most welcome to visit us at which time we could discuss your requirements and show you examples of our craftsmanship.

Why not put the pleasure back into motoring and treat yourself to a personalised car built by craftsmen.
